

ILSI NORTH AMERICA SCIENTIFIC PROGRAM MANAGER

ILSI North America—a public, non-profit, scientific, foundation that advances the understanding and application of science related to the nutritional quality and safety of the food supply—seeks an experienced Scientific Program Manager to help manage a diverse set of projects focused on food sciences, food microbiology, food safety and risk assessment.

ILSI North America achieves its mission by engaging academic, government, and industry experts in a neutral forum - by supporting professional and educational programs, conducting research, workshops and seminars, and authoring peer reviewed publications.

This position requires leadership skills and the ability to work as part of a team. Successful candidates will have relevant experience in the following areas: committee management, research project development and coordination, technical writing, presentations at scientific meetings, and conference and meeting organization. Specific experience in scientific consulting, regulatory affairs and project management is beneficial.

The ideal candidate will have master's or doctoral degree in a scientific field such as toxicology, pharmacology, risk assessment, or environmental health and have from three to six years' experience. Experience in non-profit research organization, academia, foundation, association, and government agency is a plus.

Salary is commensurate with knowledge and experience. This position may be filled at the Manager or Senior Manager level.

Individuals interested in applying for this position should apply to Careers@ilsi.org

ILSI North America is an EEO/Affirmative Action Employer M/F/D/V.
